

Neovest 5.4 released 5/1/2009

Neovest is pleased to announce its newest product release, Neovest 5.4. This new version adds several new and exciting features including Portfolio Rebalancing, Pre-Trade Analytics, as well as the ability to visually compare and chart Order Analytics against real-time market-data. Neovest 5.4 also adds additional support for trading and managing order waves, as well as the ability to replace Algo Strategy's on live orders, Pairs Trading, and enhanced Complex Option functionality.

Below is a complete listing of the enhancements and modifications in the Neovest 5.4 release. If you have questions or problems accessing any of the new functionality, please contact your Account Manager. You may also contact Neovest Technical Support at (801) 375-6850 or via e-mail at support@neovest.com
